FINAL EXAMINATION

TRIMESTER OCTOBER/ NOVEMBER 2025 (TERM 2530)

LEE1113 ESSENTIAL ENGLISH
(All Sections)

2 MARCH 2026
9.00 a.m. – 11.00 a.m.

(2 Hours)

INSTRUCTIONS TO STUDENT

1. This question paper consists of **SEVENTEEN** pages.
2. Answer **ALL** questions in **Sections A and B**.
3. Please write all your answers in the question paper.
4. This question paper is **NOT** allowed to be taken out of the examination hall.

SECTION A: READING AND VOCABULARY [30 MARKS]**PART 1: MIND MAPPING (10 marks)**

Instructions: Read the passage below carefully and complete the mind map. Write your answers in the answer table on page 4 following the mind map.

How Does Fast Fashion Affect the Environment?

- 1 While the meaning of “fast fashion” is straightforward as the description is 1
in the name after all, understanding why it has become so popular requires a deeper
look at the clothing industry. On the most basic level, fast fashion refers to clothing
that is produced quickly and sold at a low price. Today, fast fashion is growing
rapidly in volume and profit. According to research, in the United States alone, 5
fast fashion was worth \$41.15 billion in the year 2023 and is anticipated to reach
\$59.85 billion by 2030. This means that fast fashion shows no signs of slowing
down. Nevertheless, producing and consuming clothing at the current rate we are,
is taking a massive toll on the planet.
- 2 When a new style is trending, often made popular via content posted on 10
social media platforms like TikTok or Instagram, fast fashion companies quickly
produce similar products and deliver them to customers. These firms can do so by
combining efficient supply chains and design capabilities. Efficient supply chains
can manufacture small batches of clothes quickly, and they also have design
capabilities, the ability to introduce new styles at high speed. For example, online 15
retailer Shein adds around 6,000 new styles to its website every single day by
working with myriad small factories that produce a few initial samples and then
quickly make more units when a particular style is a hit. This process differs from
the traditional fashion industry, where companies typically place large orders
months in advance of the selling season. Production planning often starts more 20
than a year in advance, resulting in fewer, and less ‘trend-driven’, styles.
- 3 Nevertheless, fast fashion creates major environmental harm because, by
catering to constantly changing trends, it encourages overconsumption. This
business model first came into prominence in the 2000s, with the success of
companies such as Zara and H&M. Over the following two decades, the rise of 25
social media and e-commerce further boosted the popularity of businesses like
Shein and Temu. As a result, United Kingdom’s clothing purchases grew to 1.4
million tonnes in 2022. At the same time, the frequency of use of a typical piece
of clothing has reduced. The average number of times a garment is worn before it
is discarded has fallen by 36 per cent over the past 15 years. Hence, along with the 30
substantial rise in apparel production, the fact that clothes are discarded after just
a few wears is contributing to overconsumption.
- 4 As a result, the fashion industry has become one of the key industries
responsible for draining resources and generating waste worldwide. First, apparel
production draws on a large volume of natural resources. The types of materials 35
commonly used in fast fashion such as polyester rely on non-renewable and
carbon-intensive resources such as petroleum. Besides, the industry uses an
estimated 79 trillion litres of water per year. In fact, producing a simple cotton t-
shirt can require the same amount of water needed to satisfy one person’s drinking

Continued...

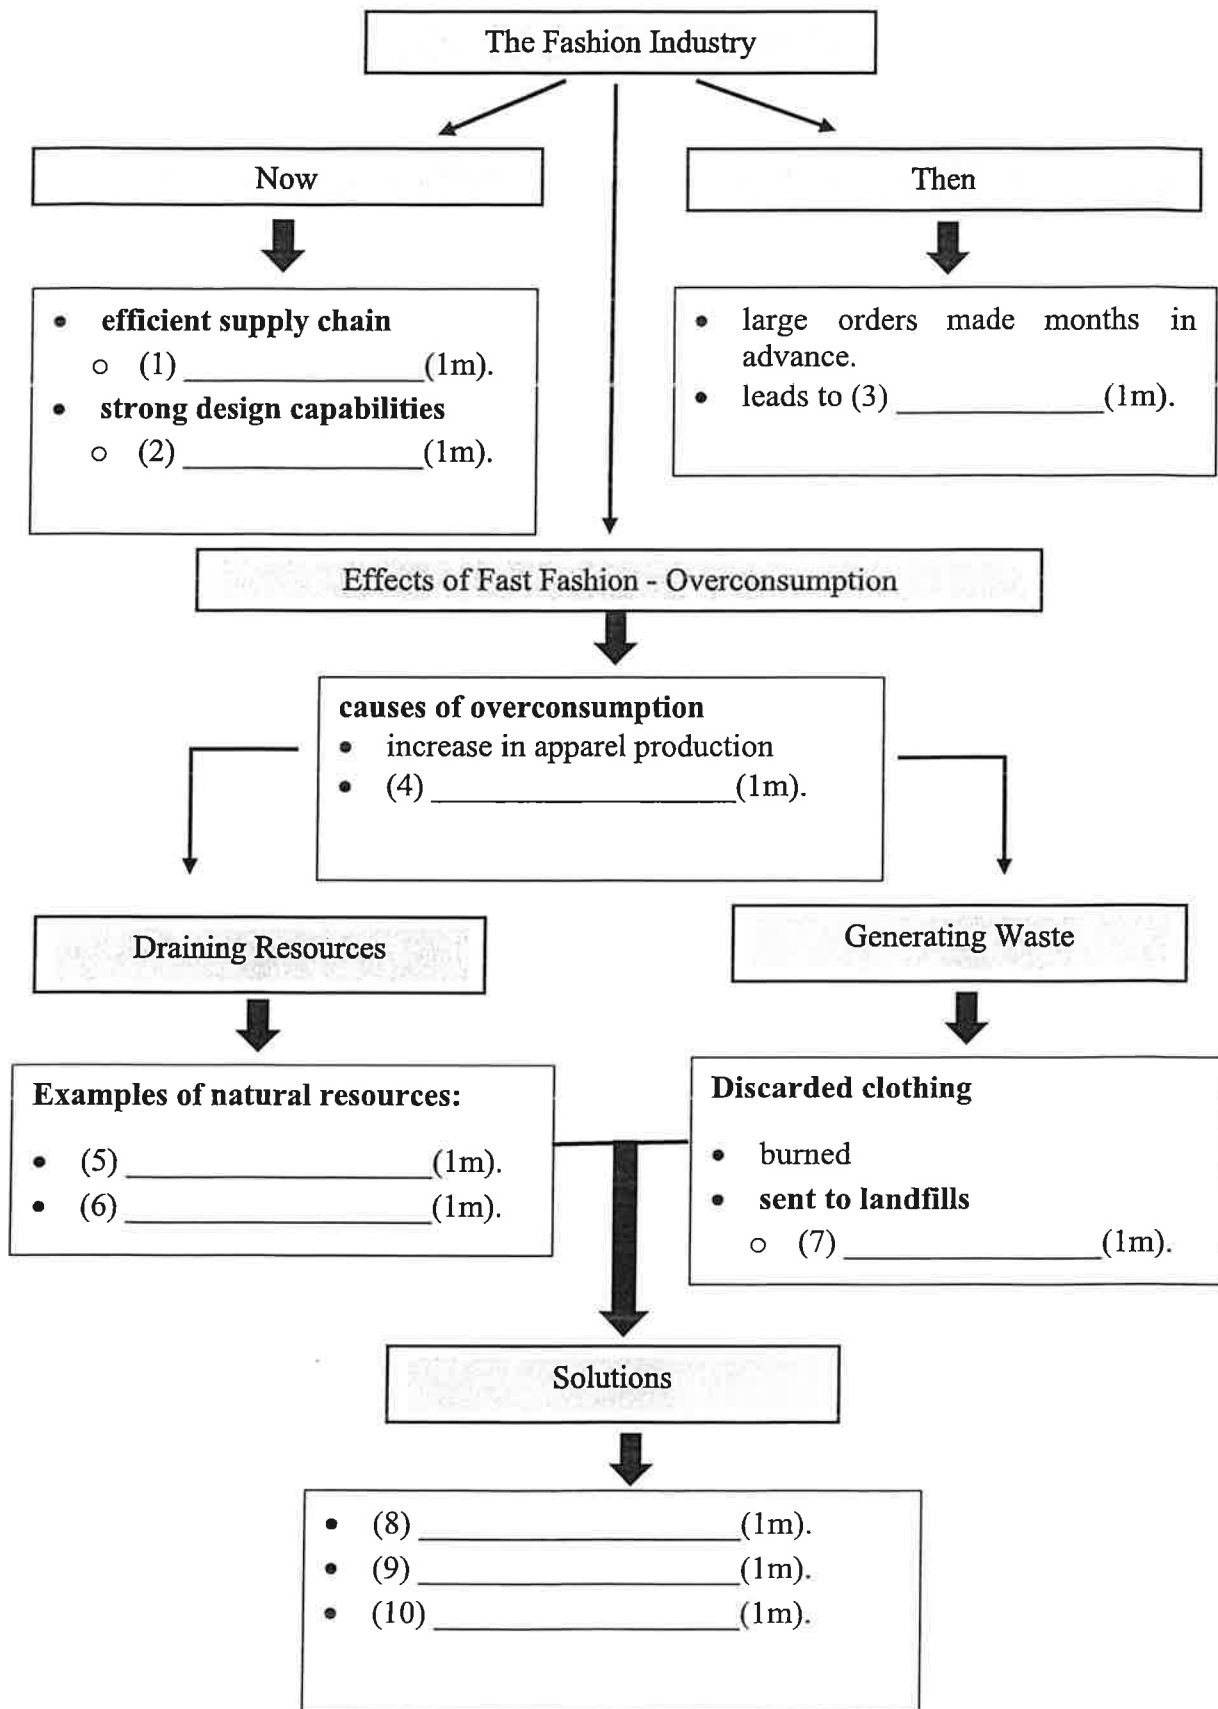

needs for two and a half years. Moreover, larger energy consumption occurs in the processing stages, for example, during spinning, weaving, knitting, and dyeing. 40

5 Another way the fashion industry harms the environment is through the large amounts of textile waste created when consumers discard clothing. The more consumers buy, the more they throw away. As a result, global textile waste now exceeds 92 million tonnes per year. Lifespans for the fast fashion products are often limited due to their lower quality. The factories mass-producing new styles prioritise speed over quality, and consumers who are chasing every trend prefer to buy cheap. As a result, consumers keep products for a shorter duration, and second-hand shops tend to reject products from fast fashion brands due to their poor quality. These clothes are then burned or sent to landfill, where they take 45 50 hundreds of years to decompose.

6 What can be done to help to mitigate these problems? First, since overconsumption is the root cause of the problems, reducing overconsumption by shifting consumer mindset toward sustainability and slow fashion is important. Shopping slower and with purpose allows people to accumulate pieces they truly love and wear for years. In addition to changing consumer behaviour, businesses also play a key role in addressing these issues. They can invest in recycling processes to salvage material from consumers' discarded clothing, increasing the amount of recycled material available for new items. Companies could then use this recycled material for production, reducing a major source of resource consumption and carbon emissions. Another practical strategy is upcycling, which involves creating new clothing from existing fabric without breaking it down into fibres. Together, these approaches can significantly reduce the fashion industry's strain on resources and its environmental footprint. 55 60

PART 2: VOCABULARY AND COMPREHENSION (20 Marks)

Instructions: Read the passage below carefully and answer **ALL** the questions that follow in the spaces provided.

The Louvre has a Wild History of Being Robbed in Broad Daylight

- 1 It took just seven minutes for a group of audacious thieves to pull off what 1
may have been one of the most remarkable crimes in modern **art**, the theft of
Napoleonic-era jewels from the Louvre in Paris on the morning of October 19,
2025. The heist, which took place while the museum was open to the public,
involved a variety of jewels once owned by members of the French monarchy, 5
including an emerald necklace and earrings that Napoleon gave his second wife
Marie-Louise for their wedding.
- 2 Now, questions are raging about how masked men could successfully evade
security and nab priceless objects d'art from one of the most important art
institutions in the world. It is far from the first time. The museum has a 10
longstanding history of shocking break-ins and unsolved thefts despite it being
built precisely to protect the nation's cultural heritage.
- 3 Though the Louvre palace dates to the 13th century, the museum was only
founded during the French Revolution, a period of fervour marked by widespread
enthusiasm for new ideas about public museums and political systems. In 1792, 15
violent insurgents stormed Louis XVI and Marie Antoinette's royal residences to
end monarchy and to **declare** the country a republic. Suddenly, the monarchy's
entire art collection belonged to the new state and were under threat from looters
who wanted to seize or smash all traces of the French monarchy. Hence, the
museum at the Louvre was founded to safeguard state property amid the chaos of 20
the revolution, as well as showcase a newly democratic France's most prized
treasures.
- 4 However, its cultural keepsakes have long proven tempting to would-be art
thieves, and over the years the museum racked up a long list of security problems,
and thefts. The shocking theft of the "Mona Lisa", then a lesser-known work by 25
Leonardo da Vinci, occurred on the morning of August 21, 1911. It was a weekday,
and Vincenzo Peruggia, an Italian immigrant who had briefly worked at the
museum, building frames and cases, dressed in his old work uniform and walked
into the Louvre unchallenged. At the time, the painting was hung on a wall in the
Salon Carré, but it was the norm for paintings to be briefly removed for 30
conservation or photography. Thus, no one noticed the painting was missing until
more than 24 hours after Peruggia walked out of the museum.
- 5 The crime was only discovered once a wealthy patron showed up at the Salon
Carré to work on a painting of the gallery. All that remained of the Mona Lisa
were the hooks that had affixed its special case, one Peruggia almost certainly 35
constructed himself to the wall. This reconstruction shows how Vincenzo Peruggia
perpetrated or carried out what has been described as the greatest art theft of the
20th century.
- 6 The Mona Lisa was only recovered in 1913, when Peruggia attempted to sell
it to another museum. It turned out Peruggia had been hiding the painting in his 40
Paris apartment. During his trial, Peruggia claimed he had stolen da Vinci's
painting as a patriotic gesture toward his home country, Italy. The painting had

Continued...

been completed in France and purchased by the French monarch, Francis I, in 1518. Meanwhile, the theft boosted the painting in the public eye, turning Mona Lisa into a household name.

7 Besides, the Nazi occupation of France in 1940 threatened some of the most 45
significant cultural losses yet as a portion of the Louvre's collection looted by
occupying Nazis. However, the Louvre's director had a plan. Before Paris fell to
Nazi Germany, Jacques Jaujard saved much of its collection, transporting over
1,800 wooden cases of precious art into the countryside. Most of the museum's
artworks made it **safe** and survived the war, and when the Nazis marched into Paris 50
in 1940, they found a mostly empty museum.

8 Security problems continued to plague the museum after it reopened in the
wake of World War II. There was the 1966 theft of antique jewellery as it was
being transported back to France after a loan to a Virginia museum. The jewels
were recovered after being found in a grocery bag in New York. In January 1976, 55
burglars stole a Flemish painting from the museum, and in December of the same
year, masked men burgled a jewelled sword once owned by French King Charles
X, accessing the museum from a second-floor scaffold. The sword has yet to be
recovered.

9 Since then, the museum has attempted to boost security amid widespread 60
criticism, even undergoing a recent security audit. Will the priceless jewels ever
be recovered? Just one of the objects has been found thus far, a glittering and now
broken tiara of emeralds and diamonds once gifted by Napoleon III to his wife,
Eugénie. However, the **fate** of the other artworks, which includes jewels worn by
multiple French queens and empresses, remains uncertain. 65

10 The experts warn museums that thieves are no longer stealing art for its
cultural value. This is because works by eminent artists such as Pablo Picasso, Piet
Mondrian or Willem de Kooning can resurface years, or decades, later in
a building's basement or behind an unassuming bedroom door. However, experts
say jewellery, coins or medals, meanwhile, are at **risk** of being lost forever and 70
quickly. Some art crime historians are worried that thieves probably do not care
about the historical, cultural, or emotional significance of these gems, and would
not blink at cutting them down into different shapes and sizes.

11 Regardless, history shows there is hope the stolen items could someday make
it back to the museum: In 2021, a suit of Italian Renaissance armour that had been 75
stolen in 1983 was recovered from a private family collection in western France.
In the meantime, the Louvre's long history with audacious thieves and the debate
about how to **secure** France's national treasures seem destined to continue.

Question 1: Extending and Developing Vocabulary in Context (5 Marks)**Instructions:** Find a word in the passage for each of the meanings below.

Meaning	Paragraph	Answer
a. fearless or showing willingness to take risk	1	_____
b. intense, steady and passionate feeling or dedication	3	_____
c. the act of deliberately committing	5	_____
d. caused continuous trouble or difficulty	8	_____
e. famous, respected or well-known	10	_____

Question 2: Affixes (5 Marks)**Instructions:** Fill in the blank in each question below with an appropriate word by adding a suitable prefix or suffix or by adding both prefix and suffix to the word provided.

Example	Answer
0. art (line 2) With his _____ skill, he turns even the simplest ideas into paintings full of beauty and charm.	artistic _____
a. declare (line 17) The government issued a _____, announcing new environmental regulations, which sparked nationwide debate.	_____ _____
b. safe (line 50) Lack of proper training and oversight can make laboratory procedures _____, increasing the risk of accidents.	_____ _____
c. fate (line 64) The _____ experiment conducted in 1928 fundamentally transformed the field of microbiology, leading to discoveries that still influence research today.	_____ _____
d. risk (line 70) The climbers proceeded _____ along the narrow ledge, knowing that one wrong step could have disastrous consequences.	_____ _____
e. secure (line 78) Many low-income households feel financially _____ due to rising cost of living and inflation.	_____ _____

Continued...

Question 3: Comprehension (10 Marks)**Instructions:** Answer **ALL** questions.

- a. Why was the creation of a museum at the Louvre considered important during the French Revolution? (2 marks)

- b. What does the fact that the “Mona Lisa” was not noticed missing for more than 24 hours suggest about the Louvre’s security practices at the time? (2 marks)

- c. What might have happened to the Louvre’s collection and France’s cultural heritage if Jacques Jaujard had not moved it before the Nazi occupation in 1940? (2 marks)

- d. State if the statements below are **true** or **false**. Justify your answers using information from the passage.

- i. The 1966 antique jewellery theft occurred while the items were in the Louvre for a temporary exhibition. (1 mark)

Continued...

- ii. The recovery of the 1983 stolen Italian Renaissance armour shows (1 mark)
that all stolen items from the Louvre will be recovered eventually.

e. State if the sentences below are a **fact** or an **opinion**. Justify your answers.

- i. During his trial, Peruggia claimed he had stolen da Vinci's painting (1 mark)
as a patriotic gesture toward his home country, Italy. (lines 40-41)

- ii. Some art crime historians are worried that thieves probably do not (1 mark)
care about the historical, cultural, or emotional significance of these
gems, and would not blink at cutting them down into different shapes
and sizes. (lines 71-73)

SECTION B: GRAMMAR [20 MARKS]**PART 1: ERROR IDENTIFICATION (10 Marks)**

Instructions: For questions 1-10, identify the underlined option that is **INCORRECT** in the following aspects: run-on sentence, sentence fragment or faulty parallelism. Write your answers (A, B, C or D) in the answer table provided at the end of the page.

1. Although streaming platforms, which have become increasingly popular, offer
A B
convenience and variety, many viewers still enjoy going to the cinema, watching new
C
releases, to experience surround sound, and sharing the excitement with others.
D
2. In today's era of rapid innovation, artificial intelligence is becoming an essential tool in
A
healthcare. By allowing doctors to detect diseases earlier, make faster decisions, and
B C
improve patient outcomes in critical situations.
D
3. Having a pet can improve a person's mental well-being and reduce loneliness. Especially
A B
for those who live alone or work long hours. Many people find comfort in their pets.
C D
4. Plagiarism remains a serious issue in academic writing because it damages the credibility
A
of the author and reduces the value of genuine research, many organisations are now using
B C
advanced software to detect copied work and promote original thinking.
D

Continued...

5. Climate change is affecting weather patterns across the globe. Causing more frequent
A
floods and longer periods of drought. Many communities are struggling to adapt as natural
B C
disasters become more unpredictable and destructive.
D
6. Though may look like an upper-body challenge, climbing is a full-body workout that
A B
challenges the heart, lungs, brain, and musculoskeletal system simultaneously.
C D
7. Managing time effectively requires setting clear goals, to prioritise important tasks, and
A
avoiding unnecessary distractions. When you plan your schedule wisely, you can
B C
reduce stress and improve productivity.
D
8. Online collaboration tools have improved workplace efficiency; many companies now
A
rely on them daily. Which has transformed how teams communicate across different time
B C
zones and coordinate project tasks effectively.
D
9. University students, especially those in their final year, are required to complete a
A B
research project, it teaches them how to collect data, analyse findings, and present results.
C D

Continued...

10. By taking part in a university club, students can enhance their confidence. It also

A

B

encourages students to build confidence, develop leadership skills, improve

C

communication, and expanding their network.

D

PART 2: ERROR CORRECTION (10 Marks)

Instructions: For questions 11-20, identify the options that are **CORRECT** and free from the following aspects: run-on sentence, sentence fragment, or faulty parallelism. Write your answers (A, B, C or D) in the answer table provided at the end of the page.

11. Choose the option which is **free of sentence fragment**.

- A. Many players enjoy adventure games because they offer exciting storylines and challenges. Some games also allow players to explore open worlds and make their own decisions. Although these games can be time-consuming, they are very rewarding.
- B. Many players enjoy adventure games. Because they offer exciting storylines and challenges. Some games also allow players to explore open worlds and make their own decisions. Although these games can be time-consuming, they are very rewarding.
- C. Many players enjoy adventure games because they offer exciting storylines and challenges. Some games also allow players to explore open worlds and make their own decisions. Although these games can be time-consuming. They are very rewarding.
- D. Many players enjoy adventure games because they offer exciting storylines and challenges. Some games also allow players to explore open worlds. Make their own decisions. Although these games can be time-consuming, they are very rewarding.

12. Choose the option which is **free of faulty parallelism**.

- A. Baking cakes is fun and relax. It requires measuring ingredients carefully, mixing the batter properly, and decorating the cake creatively. Many people find joy in baking, sharing, and tasting their own creations.
- B. Baking cakes is fun and relaxing. It requires measuring ingredients carefully, to mix the batter properly, and decorating the cake creatively. Many people find joy in baking, sharing, and tasting their own creations.
- C. Baking cakes is fun and relaxing. It requires measuring ingredients carefully, mixing the batter properly, and decorating the cake creatively. Many people find joy in baking, sharing, and enjoy tasting their own creations.

Continued...

- D. Baking cakes is fun and relaxing. It requires measuring ingredients carefully, mixing the batter properly, and decorating the cake creatively. Many people find joy in baking, sharing, and tasting their own creations.

13. Choose the option which is **free of run-on sentence**.

- A. Online scams have become more common in recent years, many people receive fake messages that look convincing. It is important to check the source before clicking any links. Awareness can help prevent people from losing money or personal information.
- B. Online scams have become more common in recent years. Many people receive fake messages that look convincing, so it is important to check the source before clicking any links, awareness can help prevent people from losing money or personal information.
- C. Online scams have become more common in recent years. Many people receive fake messages that look convincing, so it is important to check the source before clicking any links. Awareness can help prevent people from losing money or personal information.
- D. Online scams have become more common in recent years. Many people receive fake messages that look convincing, it is important to check the source before clicking any links. Awareness can help prevent people from losing money or personal information.

14. Choose the option which is **free of sentence fragment**.

- A. Although many people use social media to stay connected with friends and family. It also helps them discover news and trends that shape daily conversations. While spending too much time online can affect productivity and mental health, many users continue to rely on it every day.
- B. Although many people use social media to stay connected with friends and family, it also helps them discover news and trends. That shape daily conversations. While spending too much time online can affect productivity and mental health, many users continue to rely on it every day.
- C. Although many people use social media to stay connected with friends and family, it also helps them discover news and trends that shape daily conversations. While spending too much time online can affect productivity and mental health. Many users continue to rely on it every day.
- D. Although many people use social media to stay connected with friends and family, it also helps them discover news and trends that shape daily conversations. While spending too much time online can affect productivity and mental health, many users continue to rely on it every day.

15. Choose the option which is **free of faulty parallelism**.

- A. Teamwork requires clear communication, mutual respect, and share goals. Every member must listen actively, contribute ideas, and support one another. When people work together effectively, they achieve success, build trust, and strengthen relationships.
- B. Teamwork requires clear communication, mutual respect, and shared goals. Every member must listen actively, contribute ideas, and support one another. When people work together effectively, they achieve success, build trust, and strengthen relationships.
- C. Teamwork requires clear communication, mutual respect, and shared goals. Every member must listen actively, contribute ideas, and to support one another. When people work together effectively, they achieve success, build trust, and strengthen relationships.
- D. Teamwork requires clear communication, mutual respect, and shared goals. Every member must listen actively, contribute ideas, and support one another. When people work together effectively, they achieve success, build trust, and strengthening relationships.

16. Choose the option which is **free of run-on sentence**.

- A. Body language plays a vital role in communication it often conveys emotions that words cannot express. A confident posture can create a positive impression, and crossed arms may suggest defensiveness or discomfort. Body language builds trust, and it fosters connections.
- B. Body language plays a vital role in communication; it often conveys emotions that words cannot express. A confident posture can create a positive impression, and crossed arms may suggest defensiveness or discomfort. Body language builds trust, and it fosters connections.
- C. Body language plays a vital role in communication, and it often conveys emotions that words cannot express. A confident posture can create a positive impression crossed arms may suggest defensiveness or discomfort. Body language builds trust, and it fosters connections.
- D. Body language plays a vital role in communication, and it often conveys emotions that words cannot express. A confident posture can create a positive impression, and crossed arms may suggest defensiveness or discomfort. Body language builds trust it fosters connections.

17. Choose the option which is **free of sentence fragment**.

- A. Scientists warn that melting glaciers may awaken long-dormant volcanoes worldwide. Increasing the likelihood of eruptions. Evidence of this is already visible. In 2025, Kīlauea on Hawaii erupted, sending lava fountains hundreds of feet into the air. Similarly, the unexpected eruption of Hayli Gubbi volcano has disrupted air travel across Asia, showing how volcanic activity in one region can affect the globe.

Continued...

- B. Scientists warn that melting glaciers may awaken long-dormant volcanoes worldwide, increasing the likelihood of eruptions. Evidence of this is already visible.
